

# Sprint 2 Report

Product name: Adattarsi

Team name: Fashionista

Sprint completion data: 25/08/15

Revision number & date: Ver.1 25/08/15

---

- **Actions to stop doing**

- Each sprint term were too short. Each term was too short to finish all works as expected.
- There were only two sprint on this project. There were not enough number of sprints on project.
- Due to busy schedule of each team members, meeting time was frequently delayed.
- Due to busy schedule of each team members, each member were busy to do their own work such as their assignments.
- Some member got too much amount of work, so it delayed development of some essential functions.

- **Actions to start doing:**

- More concentration on project at scrum meeting.
- Rearranged work to do at sprint, to make possible to meet criteria at each sprint.
- Reduced amount of work in project to make project could be finished in given amount of time.
- Set time to do their own work which is related to sprint before every scrum meeting. From setting time, each member could do their allocated work.
- Rearranged amounts of works and tasks to be distributed more equally across whole members.

- **Actions to keep doing:**

- Though some meeting were delayed, we had scrum meeting at every scheduled day.
- This is the answer to the question, "What is working well that we should continue to do?" The items should take the form of a brief description of what the team wants to start doing, followed by a brief explanation.

- **Work completed/not completed:**

- (8) As a user I can choose my body type so that I can see other users' post who have similar body type with me. - **completed**

- (5) As a uploader I can edit my photos so that I can protect my privacy such as face and background which contains private informations. - **not completed**
- (5) As a user I can put bookmarks so that I can remember my favorite posts. - **not completed**
- (4) As a user I can push alarm to someone whom I gave comment so that I can communicate with others better. -**not completed**

- **Work completion rate:**

- Total number of user stories completed during the sprint 2: 1
- Total number of estimated ideal work hours completed during in sprint 2: 30hours
- Total number of days during the sprint 2: 10 days
- The user stories/day and ideal work hours/day figures should be reported in sprint 2: 0.4 stories and 3 hours
- Average user stories/day and average ideal work hours/day figures computed (only include sprint 1 and 2): 0.3stories and 3.1hours
